

MAKE YOUR PROTON PLANS ROBUST TO CHANGE

With high precision comes high sensitivity. As the market leader in proton therapy treatment planning, RaySearch understands this. That's why we've designed RayStation* to account for every eventuality. Experience the premier system, with access to all the unique innovations RayStation is renowned for.

Highlights include:

- Fast Monte Carlo dose computation on GPU (New!)
- Robust optimization and evaluation
- 4D-optimization
- PBS optimization with apertures
- Multi-criteria optimization with robustness
- Fully integrated adaptive planning
- Simulated organ motion
- Interplay evaluation

*Subject to regulatory clearance in some markets
